

C2.351# – DESIGNATION BY SPACING. (4/04) Within Subdivision(s) or cutting unit(s) 20, 900, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 20 feet. The tree is within 3/ 10 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inch stump diameter; and this tree (p. pine) is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Within Subdivision(s) or cutting unit(s) 100, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 38 feet. The tree is within 3/ 19 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inch stump diameter; and this tree (p. pine) is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Within Subdivision(s) or cutting unit(s) 110, 120, 160, 180, 200, 220, 230, 330, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 25 feet. The tree is within 3/ 12 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inches stump diameter; and this tree is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Within Subdivision(s) or cutting unit(s) 170, 210, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 40 feet. The tree is within 3/ 20 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inches stump diameter; and this tree is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Within Subdivision(s) or cutting unit(s) 190, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 28 feet. The tree is within 3/ 14 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inches stump diameter; and this tree is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Within Subdivision(s) or cutting unit(s) 360, as shown on Sale Area Map, all 1/ live trees, except trees Marked with 5/ orange paint or described to be left uncut, that meet Utilization Standards and one or more of the following criteria are designated for cutting.

(a) The required spacing is a maximum average of 2/ 32 feet. The tree is within 3/ 16 feet of a 1/ live tree that has a larger stump diameter than it; and the larger tree is not designated for cutting.

(b) The tree is within 3/ NA feet of a 1/ NA tree greater than or equal to 4/ NA inches stump diameter; and this tree is not designated for cutting.

(c) The tree is Marked with 5/ blue paint.

Distances are measured horizontal distance, outside bark stump height to outside bark stump height. Stump diameter is measured outside bark at stump height in a horizontal plane and is the average of a measurement across the short axis through the true center of the stump and a second measurement at right angles to the short axis.

All 1/ NA shall be left as leave trees, unless Marked with 5/ NA paint. No tree greater than or equal to 4/ NA inches stump diameter shall be cut, unless Marked with 5/ NA paint. Cutting unit boundaries and other trees that shall be left uncut are Marked with 5/ NA paint.

Purchaser and Forest Service shall agree to skid trail location under B6.422. Skid trails shall be no greater than NA feet wide with a NA foot spacing.
